Re: Price Increase Notification

Effective Date: July 15, 2026

Dear Valued Customer,

We appreciate your continued partnership and the trust you place in Braxton Harris Company as your supply partner.

Due to sustained cost pressures across our supply chain, we will be implementing a price adjustment effective July 15, 2026. Category-level increases range from 3% to 8%, with most product lines at 3% to 5%. The largest adjustments fall on copper- and brass-intensive categories. Some individual items may vary above or below based on specific material and manufacturing cost impacts.

This decision follows careful review and is driven by several factors affecting our industry, including:

- Continued increases in copper and brass alloy costs, influenced by the London Metal Exchange (LME)
- Rising costs of petroleum-based products, including plastics
- Section 232 tariffs on steel, aluminum, and copper
- Higher inbound freight and ongoing manufacturing cost pressures
- Continued weakening of the U.S. dollar against key sourcing currencies

An updated price sheet reflecting all changes, effective July 15, 2026, is enclosed for your reference. We encourage you to review it with your purchasing team ahead of the effective date.

Orders placed prior to the effective date will be honored at current pricing for immediate shipment and within normal purchasing volumes. Braxton Harris Company reserves the right to limit order quantities that significantly exceed a customer's normal purchasing pattern, as well as any related backorders that may arise during this period.

We remain committed to delivering the availability, quality, and service you expect, and to being transparent with you as we navigate these market conditions. If you have any questions or would like to discuss how these changes affect specific items, please contact your sales representative.

Thank you again for your business and continued partnership.

Sincerely,

Braxton Harris
